Hi Lara,

EGLE has reviewed the revised HMP and has noted two items that need updating or inclusion.

Section 1.1.1: Text states, "The parties also agreed that the former northern outlet channel from the Units 1/2 Impoundment would be evaluated for potential inclusion of the revised boundary. This area is still under investigation and awaiting feedback from EGLE and EPA (Figure 2)." A decision has been made by EPA and should be reflected in the text.

Section 2.4: Text should outline the strategy or plan if/when certain staff gauges are dry given the fluctuations of Lake Michigan water levels. EGLE has previously discussed this issue with the site verbally, but the strategy should also be outlined in the HMP.

Kent.
